### **Wind-lock Offering Benjamin Obdyke Products**

Leesport, PA – With an increased awareness for water management products in the market, Wind-lock is announcing the addition of Benjamin Obdyke weatherization solutions.

“As more of our customers are trying to incorporate new weatherization products for their contractor customers, we realized the opportunity with Benjamin Obdyke,” explains Carter Benjamin, Executive Vice President for Wind-lock.

These products are now available through Wind-lock:

- **Benjamin Obdyke Home Slicker®** - A vertically-channeled, three-dimensional matrix that provides a continuous space for drainage and drying, a thermal break and pressure equalization—eliminating the threat of trapped moisture. Home Slicker 10 is designed to meet the 10mm code requirements in Canada.
- **Benjamin Obdyke Home Slicker® Plus Typar®** - A cost-effective, labor and material saving, rainscreen combined with a water resistive barrier. Each roll contains the patented Home Slicker three-dimensional matrix bonded to Typar.

-MORE-

- **Benjamin Obdyke Rainscreen Stone & Stucco®** - The only vertically channeled rainscreen specifically designed for use with manufactured stone, natural stone, stucco, and masonry applications. Each roll contains Home Slicker bonded to a fabric which prevents mortar from entering the wall cavity during cladding installation.
- **Benjamin Obdyke Blockade®** - This system blocks mortar from clogging the weep holes allowing moisture to flow freely out of the wall cavity.

Information on this product can be found on the Wind-lock web site at [www.wind-lock.com](http://www.wind-lock.com) or by calling Wind-lock at 800-872-5625.

*Wind-lock markets a wide variety of products used in the residential and commercial building construction markets, with particular emphasis on the EIFS, ICF, SIP, Stone Veneer and Stucco construction methods. Wind-lock has been servicing the construction industry for more than 25 years, starting with tools and accessories for the EIFS industry. The company has grown to serve many segments of the construction industry and ships its products nationally and internationally from five warehouses located across the country.*
