Wind-lock Adds Northwest Warehouse

Leesport, PA – Wind-lock has added a fifth warehouse in Portland, Oregon to service its northwestern customers.

“We realized that this was an area that we really needed to have a warehouse to reduce the shipping time and costs for these customers,” explained Andrea Loud, Director of Operations for Wind-lock. “This strategic location will serve our Western Canada customers down to Southern California and east to Wyoming.”

The warehouse will stock items most frequently ordered by customers in that region, including but not limited to fasteners, foam guns, spray foam and weatherization products.

Serving the construction industry for more than 25 years, Wind-lock has expanded its offering beyond tools and accessories for the EIFS industry. The company has grown to serve other segments of the residential and commercial construction industries including air sealing, drywall, exterior wall systems, insulation, moisture management and weatherization. Delivering “What You Need, When You Need It”, Wind-lock ships its products nationally and internationally from five warehouses located across the country. # # #
