Section 1 - Identification

Product Name: EIFS Cleaner (16143)

Envyss, LLC
P.O. Box 907
Blue Ridge, GA 30513
770-723-7040

Emergency Phone: 800-535-5053

Product Use: Removes efflorescence, stains, scale and mineral deposits from masonry surfaces.

Section 2 - Hazards Identification

GHS Ratings:

| Skin corrosive | 1A | Destruction of dermal tissue: Exposure < 3 min. Observation < 1 hour, visible necrosis in at least one animal |
| Eye corrosive  | 1  | Serious eye damage: Irreversible damage 21 days after exposure, Draize score: Corneal opacity >= 3, Iritis > 1.5 |

GHS Hazards

- H314 Causes severe skin burns and eye damage
- H318 Causes serious eye damage

GHS Precautions

- P260 Do not breathe dust/fume/gas/mist/vapours/spray
- P264 Wash hands thoroughly after handling
- P280 Wear protective gloves/protective clothing/eye protection/face protection
- P310 Immediately call a POISON CENTER or doctor/physician if you feel unwell
- P321 Specific treatment (see First Aid below or label)
- P363 Wash contaminated clothing before reuse
- P301+P330+P331 IF SWALLOWED: Call a POISON CENTER or doctor/physician. Rinse mouth. Do NOT induce vomiting
- P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower
- P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing
- P305+P351+P338 IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing
- P405 Store locked up
- P501 Dispose of contents/container in conformance with State, Local, and Federal regulations.

Signal Word: Danger

Section 3 - Composition, Information on Ingredients
**Section 4 - First Aid Measures**

After inhalation:
Take affected persons into fresh air and keep quiet. Supply fresh air. Call a doctor immediately.

After eye contact: Rinse opened eye for several minutes under running water. Call a doctor immediately.

After skin contact: Immediately wash with water and soap and rinse thoroughly. Call a doctor immediately.

After swallowing: Rinse out mouth and then drink plenty of water. Do not induce vomiting; call for medical help immediately. NOTE: Never give an unconscious person anything to drink.

- Information for doctor:
  - Most important symptoms and effects, both acute and delayed: Causes severe skin burns and eye damage.
  - Gastric or intestinal disorders: Indication of any immediate medical attention and special treatment needed Medical supervision for at least 48 hours.

**Section 5 - Fire Fighting Measures**

Flash Point: N/A
LEL: UEL:
The product is not flammable
CO₂, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

- For safety reasons unsuitable extinguishing agents: Water with full jet

Hazardous Decomposition:
Chlorine, Hydrogen Chloride, Hydrogen gas
Advice for firefighters Protective equipment: Wear self-contained respiratory protective device.
Wear fully protective suit. Additional information Cool endangered receptacles with water spray.
Use fire extinguishing methods suitable to surrounding conditions.

**Section 6 - Accidental Release Measures**

Personal precautions, protective equipment and emergency procedures: Wear protective equipment. Keep unprotected persons away. Mount respiratory protective device.
Environmental precautions: Dilute with plenty of water. Do not allow to enter sewers/surface or ground water.

Methods and material for containment and cleaning up: Absorb liquid components with liquid-binding material. Use neutralizing agent. Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.

**Section 7 - Handling & Storage**

Handling:
- Precautions for safe handling
  - Keep receptacles tightly sealed.
  - Ensure good ventilation/exhaustion at the workplace.
  - When diluting always pour product into water and not vice versa.

- Information about fire - and explosion protection: No special measures required.

Conditions for safe storage, including any incompatibilities
- Storage:
  - Requirements to be met by storerooms and receptacles: Store only in the original receptacle.

- Suitable material for receptacles and pipes: Stainless steel.
- Information about storage in one common storage facility: Store away from reducing agents.
Store away from metals.
Do not store together with alkalis (caustic solutions).
Do not store together with organic materials.
· Further information about storage conditions: Keep container tightly sealed.

### Section 8 - Exposure Controls/Personal Protection

<table>

</tbody>
</table>

General protective and hygienic measures:
The usual precautionary measures are to be adhered to when handling chemicals.
Do not eat or drink while working. Keep away from foodstuffs, beverages and feed.
Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.
Respiratory protection:
Use suitable respiratory protective device only when aerosol or mist is formed.
In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.
Limitation and supervision of exposure into the environment
Avoid discharging of Hydrochloric / Phosphoric acid solutions into municipal wastewater, surface water or soils, when such discharges are expected to cause significant pH changes.
· Risk management measures
Regular control of the pH value previous to or during discharges into open waters is required. Discharges should be carried out as to minimize pH changes in receiving surface waters. In general most aquatic organisms can tolerate pH values in the range of 6-9.
· Eye protection:
Tightly sealed goggles
· Body protection:
Acid resistant protective clothing,Boots
· Protection of hands:
Protective gloves
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. · Material of gloves Butyl rubber, BR Fluorocarbon rubber (Viton) Nitrile rubber, NBR Natural rubber, NR Chloroprene rubber, CR Neoprene gloves
· Penetration time of glove material
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
· Not suitable are gloves made of the following materials: Leather gloves

**Section 10 - Stability & Reactivity**

**STABLE**

Oxidizing agents, acids, nitrogen containing organic, metals, iron, copper, nickel, cobalt, organic materials, and ammonia. Corrosive to most metals with evolution of hydrogen gas, which may form explosive mixtures with air.

**Instability Temperature:** 85°C. Rate of decomposition increases with heat.

**Conditions of Instability:** High heat, ultraviolet light.

**Special Remarks on Reactivity:** Rate of decomposition increases with heat. Hazardous polymerization will not occur.

**Section 11 - Toxicological Information**

- Specific symptoms in biological assay:
  - Primary irritant effect:
    - on the skin: Caustic effect on skin and mucous membranes.
    - on the eye: Strong caustic effect.
    - Sensitization:
      - Phosphoric and Hydrochloric acids are classified as skin corrosive, thus a further assessment for skin sensitization is not necessary.
      - Additional toxicological information:
        - Swallowing will lead to a strong caustic effect on mouth and throat and to the danger of perforation of esophagus and stomach.
        - Toxicokinetics, metabolism and distribution:
          - This substance is not considered to have bioaccumulative potential as it is highly soluble in water.
          - For risk assessment purposes oral absorption is considered to be 50-100%, inhalation absorption 100% and dermal absorption 50-100%.
          - Wide distribution throughout the body is to be expected and excretion will be predominantly via urine.

**Section 12 - Ecological Information**

Do not discharge into waterways. The strong lowering of pH can destroy organisms.

**Component Ecotoxicity**

- **Muriatic Acid**
  - This product is toxic to fish and aquatic organisms. Do not contaminate water containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**Section 13 - Disposal Considerations**

Recommendation
Must not be disposed together with household garbage. Do not allow product to reach sewage system. Disposal must be made according to official regulations.
Small amounts may be diluted with plenty of water and washed away. Dispose of bigger amounts in accordance with Local Authority requirements.

Uncleaned packaging Recommendation:
Empty contaminated packagings thoroughly. They may be recycled after thorough and proper cleaning. Packagings that may not be cleansed are to be disposed of in the same manner as the product. Disposal must be made in accordance with Local Authority requirements.

Recommended cleansing agents: Water, if necessary together with cleansing agents.
